Why BitDefender?

- ✓ Award-Winning, and Internationally Certified Products
- ✓ Trusted by Tens of Millions of Customers, Worldwide
- ✓ Around-the-Clock Technical Support
- ✓ 30 Day Money-Back Guarantee

Stop Attacks On Your Personal Data

With automated, hourly updates and improved detection features like *Quick Scan*, BitDefender shuts down viruses, spyware, hackers and other threats. You can eliminate unwanted junk mail and encrypt your personal information so it never leaks over email, social media networks, IM, or websites that track your online activities. Start shopping, banking, and downloading online with absolute confidence.

Ramp Up Response Time

BitDefender's new *Performance Optimizer* helps you quickly identify the applications that are slowing you down, and the *Tune-Up* feature takes corrective actions to improve the safety and response time of every PC in your home.

Stylize To Match Your Needs

Match the interface to your level of comfort by selecting between *Basic*, *Intermediate*, or *Expert* settings—and quickly create shortcuts to frequently used controls.

PROTECTION JUST GOT PERSONAL

At BitDefender we don't like one size fits all software. We believe the software should adapt to you.

Microsoft Windows Live Messenger 8
Firefox 3.x
Thunderbird 3.0.4
Outlook 2003, 2007, 2010
Outlook Express
Microsoft Windows Mail
Adobe Flash Player 10.0.45.2
.Net framework 2.0

Stop Viruses and Spyware Cold

Proactive protection stops new viruses and malware that other products miss.

Safeguard Your Privacy

Eliminate the chances your data and conversations are leaked to others over email, social media networks, IM, or websites that track your online activities.

Keep Intruders Out

Establish a two-way firewall with just a few clicks, to continuously monitor your Internet connections and prevent unauthorized access—even over a Wi-Fi network.

Keep Your Family Safe

With parental controls you'll receive reports, by browser, email, or cell phone, on recent online activity for each computer in your home network.

Boost Performance

Optimize your system by identifying the applications that slow you down. Then, using *Tune Up* make the recommended corrective actions to improve the speed of your PC.

Online Backup

Store photos, movies, music, and data on a secure Internet server, and access them from anywhere on the Internet.

Play and Work Seamlessly

Automatically activate *Game*, *Laptop*, or *Silent Mode* to minimize interruptions, prolong battery life, or reduce system load to ensure seamless and secure gameplay.
